SUMMARY

Undergraduate **Computer Science** student at **CUHK** with **nearly two years of software engineering experience**. Strong background in **full-stack development** across web and mobile platforms, with a growing focus on AI application engineering. Proven track record of **shipping scalable features**, **optimizing performance**, and **writing maintainable code**. Regularly **leverage AI tools** to accelerate delivery.

EDUCATION

The Chinese University of Hong Kong

Sep. 2023 – Jul. 2027 (expected)

Bachelor of Science in Computer Science

- Major GPA (up till 2025-26 summer): 3.916/4.000
- CSE Outstanding Academic Performance (Bronze Award; top 5%), 2025-26
- Dean's List (top 10%), 2023-2026
- Relevant Coursework: Data Structures and Algorithms, Artificial Intelligence, Software Engineering, Databases.
- Minor in Japanese Language.

WORK EXPERIENCE

Software Engineer Intern | React Native, Ruby on Rails, PostgreSQL

Nov. 2024 – Present

10X Groupchat, LLC

United States (Remote from Hong Kong)

- Contributed to the development of **Tribe Chat Pro**, a production chat application serving thousands of users.
- Optimized API layer by refactoring JSON response structures, reducing data transfer by over 95%.
- Improved rendering performance by more than 10% in terms of FPS, through component memoization and re-render optimization.
- Partnered with UI/UX design team to implement new features and maintain consistency across platforms.

Software Engineer Intern | ReactJS, React Native, Python, ASP.NET, MySQL

May 2025 – Aug. 2025

NextGen Solutions Limited

Hong Kong

- Developed and maintained the **GoPingPong** mobile app.
- Built custom Odoo modules for enterprise clients to facilitate easy and efficient handling of invoices.
- Implemented frontend interfaces for Pivotal-AI services (OCR, image generation, chat bot and speech to text).
- Designed and implemented the API for feature access control and automatic email sending in Pivotal-AI services.

PROJECTS

CUHK Venue & Equipment Booking SaaS | ReactJS, Ruby on Rails, PostgreSQL, Git

Feb. 2026 – Apr. 2026

- Led full-stack development of a booking platform with a team of 5; achieved full marks on course assessment.
- Established code review standards, optimized database queries to eliminate N+1 issues, and enforced DRY principles across the codebase.
- Designed and implemented role-based access control.

Agar.io HSLO custom client and server | PixiJS, Node.js, Git, Google Cloud Platform

May 2019 – Dec. 2022

- Attracted more than 1000 players and around 40 active daily players.
- Implemented efficient binary protocol for low-latency client-server communication using WebSocket API.
- Utilized data structures like quadtree to efficiently process more than 10000 entities every 40 milliseconds.
- Cached textures to improve rendering performance by over 100% in terms of FPS compared to the original client.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Ruby, C, C++, C#, Java, Python, SQL

Frameworks: ReactJS, React Native, TailwindCSS, Ruby on Rails, ASP.NET, Flask

Developer Tools: Git, Docker, Android Studio, Visual Studio Code, Claude Code, GitHub Copilot, Google Cloud Platform

Libraries: PixiJS, jQuery, NumPy, Matplotlib, PyTorch, Transformers

OTHER SKILLS

Languages: Cantonese (native), Mandarin (fluent), English (fluent), Japanese (intermediate)

Tools: Microsoft Office, Adobe Photoshop CS6, Sony Vegas Pro 13, Audacity
